

Non-carbonated slush is an icy cold mixture of sugar and water, flavored with syrup. Pre-mixed products are directly dispensed from the freezer. Post-mixed products use a neutral base where flavors are added to the cup and blended during dispensing, allowing unlimited flavor choices from one freezer.

Frozen beverage equipment is available in models from small footprint to large capacity units designed to handle volume demands. All can be used as merchandisers to create impulse sales.

Frozen beverages offer a simple way to add an exciting traffic builder to any business and additional profit to every register. Use the chart below to calculate your additional profit potential when adding non-carbonated slush to your offerings.

NON-CARBONATED SLUSH (16 OUNCE)	SAMPLE FIGURES	YOUR FIGURES
Selling price	\$.99	\$
Less food cost	— .26	—
Less cup cost	— .05	—
Profit per slush	\$.68	
Multiply servings per day	x 50	x
Profit per day	\$ 34.00	\$
Multiply days open per week	x 7	x
Profit per week	\$ 238.00	\$
Multiply weeks open per month	x 4	x
Profit per month	\$ 952.00	\$
Multiply months open per year	x 12	x
Profit per year	\$ 11,424.00	

Note: Costs and profit projections are based on approximate national mix cost averages.

Carbonated slush is a mixture of Co², syrup and water that produces a fluffy, light texture with a snappy taste that kids of all ages love. A wide variety of available syrup flavorings allow you to serve the products that are popular in your locale.

Branded syrup programs allow you to serve your customers their favorite soft drinks as the lighter, fluffier beverages they love to consume anytime, day or night. And, the inherent promotional value of established brands becomes a natural traffic builder for you and your high profit margin product.

These trendy, frozen beverages offer a new way to add profit to your existing beverage sales. Use the chart below to calculate your additional profit potential when adding frozen carbonated beverages to your offerings.
